

Dan Aas

Managing Consultant

Mr. Aas joined E3 in 2017 upon completing a Master of Public Policy and a Master of Arts in Energy and Resources from the University of California, Berkeley. At E3, Mr. Aas conducts climate policy and energy market analysis on behalf of local and state government, project developer and utility clients. His recent work has focused on strategies to decarbonize heat and the role of natural gas utilities in jurisdictions targeting economy-wide emissions reductions. Mr. Aas brings with him extensive knowledge of policy planning, development and implementation as well as regulatory model analysis.
