To Whom It May Concern:

Please consider this letter my official statement of interest in serving on the Western Energy Imbalance Market Governance Review Committee.

The continued success of the Western EIM and regional market coordination in general is imperative to meeting the challenges of the changing energy landscape in the West, serving customer preferences, and providing consumers with the reliable and cost-effective energy they require. I view a successful and timely EIM governance review process as an imperative step toward meeting these larger goals. If selected, I am willing to devote the necessary time to make this a successful process.

Since the formation of the Western EIM, I have demonstrated commitment to the EIM and its governance structure. I am a current and an original liaison to the EIM Regional Issues Forum. I have represented two different sectors in this capacity and served as the chair of the RIF from June, 2017 through June, 2018. In these roles I gained experience and demonstrated leadership working effectively with all sectors and interests involved in the EIM governance review process. Specifically, I have experience working with CAISO management, legal staff, and the EIM Governing Body on many of the exact topics the GRC will confront in this review.

I am committed to developing a balanced approach to EIM governance that will successfully attract numerous and diverse market participants, both in terms of geography and commercial interest. Similarly, I believe a successful governance review process must ensure a solid governance foundation capable of evolving with a changing energy landscape in the West.

More generally, I believe I have a reputation for working constructively with diverse stakeholders and that my professional knowledge and relationships across the Western Interconnection will benefit the GRC. I am driven by solving problems, reaching consensus, and producing positive results in a timely fashion. I bring this motivation to the GRC and understand the goal is to identify and assess whether there are any prudent refinements the current governance structure and process.

Please do not hesitate to reach out to me with any questions regarding this statement of interest or for additional background on my experience in the industry.

Thank you for your consideration,

Cameron Yourkowski
