Catherine Hackney
Southern California Edison Company
Sector Lead, Participating Transmission Owners

RE: Governance Review Committee

Dear Catherine:

By this letter I would like to express my interest in being considered for nomination by the Participating Transmission Owner sector and service on the Governance Review Committee.

As described in attached brief statement of qualifications, the issue of regional markets, and in particular the governance thereof, is one on which I have considerable experience. I would appreciate and be honored by the opportunity to put that experience to work in efforts to enhance successful operations of the Energy Imbalance Market for all consumers.

Thank you very much. Let me know if you have any questions.

Sincerely,

C. Anthony Braun

David Rubin
NV Energy
Sector Lead, EIM Entities

RE: Governance Review Committee

Dear David:

By this letter I would like to express my interest in being considered for nomination by the EIM Entity Sector and service on the Governance Review Committee.

As described in attached brief statement of qualifications, the issue of regional markets, and in particular the governance thereof, is one on which I have considerable experience. I would appreciate and be honored by the opportunity to put that experience to work in efforts to enhance successful operations of the Energy Imbalance Market for all consumers.

Thank you very much. Let me know if you have any questions.

Sincerely,

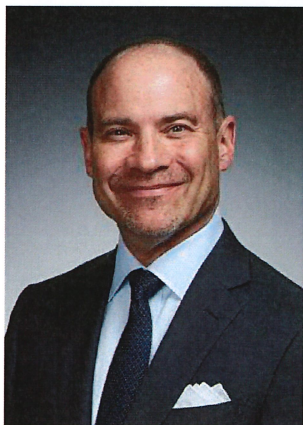

C. Anthony Braun

Tony Braun

For over two decades, Tony has provided counsel to California public agencies on all manner of regulatory, commercial, and legislative issues associated with the electric utility industry. From restructuring of the utility industry, establishment of the California Independent System Operator Corporation, implementation of the new market design, reformation of transmission planning processes and FERC Order No. 1000, development of resource adequacy requirements, renewable integration, and formation of the new Energy Imbalance Market (EIM), Tony has counseled publicly-owned utilities as they sought to navigate ever-changing new market rules and shape these rules to fit their consumer-owned business model.

Specific to the Governance Review Committee and possible service on the Committee, Tony was appointed by the CAISO Board and served on the Transitional Committee that made the recommendations on how the current EIM might be governed. Subsequent to that, Tony served as the initial Chair of the Regional Issues Forum (RIF) which was an adopted element of EIM governance as proposed by the Transitional Committee. He continues to serve as a RIF Liaison on behalf of the Publicly-Owned Utility sector. Tony was also an active participant in governance discussions as part of the multi-year consideration of modified CAISO governance in conjunction with possible participation by PacifiCorp, and consideration of state legislation to accomplish that goal.

Tony routinely participates in proceedings before the Federal Energy Regulatory Commission, the California Public Utilities Commission, CAISO, and California Energy Commission on a wide array of energy policy issues.

Smith Wynne

Tony's practice extends beyond strictly California market matters. as he was involved in the formation of Peak Reliability Corporation (Peak) to serve as the Reliability Coordination for the Western Interconnection, including matters such as bylaw development, corporate governance, and funding, and was active in the recent transition of RC services from Peak to RC West on behalf of his clients.

Prior to founding BBSW, Tony worked in the General Counsel's office of the Sacramento Municipal Utility District, the law firm of Duncan, Weinberg, Miller & Pembroke, P.C., and the Office of U.S. Senator Paul S. Trible, VA. Tony received his Bachelor of Arts in Economics in 1985 from the University of Virginia, and his law degree in 1991 from the College of William and Mary. He is a member of the Bars of both the Commonwealth of Virginia and the State of California.
