Re: California ISO Energy Imbalance Market Transitional Committee  
Publicly Owned Utilities sector nomination

Dear Mr. Braun:

The Energy Authority, Inc. (TEA) would like to take this opportunity to nominate Mr. Bill Clarke as a Publicly Owned Utility (POU) sector representative for the California ISO (CAISO) Energy Imbalance Market (EIM) Transitional Committee. Bill is TEA's Executive Director, RTO Market Services & Analytics. In the twelve years Bill has been with TEA, he has had the lead responsibility for TEA's expansion into the RTO markets. TEA currently serves over 40 POU's nationwide, including 14 POU's, representing over 14,000 MW of load and resources, in three organized markets – MISO, PJM, and SPP. Additionally, TEA currently provides portfolio management and trading services to 9 POU's in the Pacific Northwest (PNW) and is currently expanding our services into the CAISO market in 2015.

In addition to leading TEA's efforts in these existing markets, Bill has also been actively involved with the increased activities in the western markets such as the PNW's assessments of an imbalance market and WECC's evaluations of an imbalance market assessments across the entire western interconnect. Bill is recognized in the PNW as a subject matter expert in the formation and operation of organized markets. Bill has made numerous presentations in the PNW, including a full-day workshop in collaboration with the Northwest Power Pool (NWPP).

Mr. Clarke has been actively involved in the successful implementation of organized markets since the late 1990s when he served as the Project Manager for the initial creation of the Midwest ISO (now the Midcontinent ISO). In that role, he supported the efforts of the founding utilities to draft the first Transmission Owner's Agreement that formed (and still forms) the foundation, committees, and governance of the MISO. He also supported the drafting of the first Open Access Transmission Tariff (OATT) for the MISO.

When Bill joined TEA in 2002, he was responsible for developing the market services for TEA's clients in the MISO market footprint. He also worked closely to represent public power's interests in the rules being drafted for MISO's Energy Market that went live on April 1, 2005. Subsequent to the start of the MISO Energy Market, he also represented public power and TEA's client's interests and worked closely with MISO in the implementation of MISO's Ancillary Services Market that became operational in 2006. Since then, he has continued to work to advance the organized markets and public power at PJM and SPP.

Overall, TEA is pleased to offer Mr. Clarke's 37 years of utility experience to the CAISO's EIM Transitional Committee. TEA will support Bill's commitment to the Committee of at least two years.

If you have any questions regarding TEA's nomination of Mr. Clarke to the Transitional Committee, please contact either me at (904) 360-1403 or Jeff Fuller at (425) 460-1110.

Sincerely,

Joanie C. Teofilo  
President and Chief Executive Officer
