Re: Extended Day-Ahead Market Initiative

Dear Ms. Joanne Serina,

The Clean Energy Buyers Association (CEBA) submits this letter in support of the comments submitted on November 22, 2022 by the Public Interest Organizations (PIOs) on the Extended Day-Ahead Market (EDAM).

CEBA is a national association of large-scale energy customers seeking to procure clean energy across the U.S. With over 340 members from across the commercial and industrial sectors, non-profit organizations, as well as energy providers and service providers, CEBA's members are actively working to create a resilient, zero-carbon energy system. CEBA and its members are actively working with regulators, grid operators and others in the west on market design and governance issues in emerging organized wholesale markets. CEBA supports these efforts to increase regional coordination through well-designed and well-implemented organized wholesale markets. Furthermore, CEBA is committed to achieving a 90% carbon free electricity system by 2030 and well-functioning organized wholesale markets are a vital piece of the puzzle.

CEBA was unable to provide feedback during the comment period but wishes to express its support for the PIOs' comments and our general support of the EDAM construct as we see an alignment between the comments, the EDAM design, and our market design principles. CEBA's priorities are independent and responsive grid governance, management, and operation as well as transparency and broad stakeholder engagement.

In closing, we appreciate the opportunity to express our support for the PIOs' comments and look forward to participating in the next steps of the ISO's stakeholder process as the work continues to develop organized wholesale markets. CEBA is encouraged by the progress made this year and supports

the formation of well-designed and well-implemented electricity markets that serve the needs of all customers.

Respectfully Submitted,

/s/ Adrienne Mouton-Henderson
